Descriptors *American Indians, *Average Daily Attendance, Day Schools, Dormitories, Federal Programs, Geographic Regions, High School Graduates, Hospital Schools, Public Schools, Residential Schools, School Construction, *School Statistics, Statistical Data, *Student Enrollment, Summer Programs

Statistics concerning Indian education for the fiscal year 1968 are provided by the Bureau of Indian Affairs (BIA) which had direct responsibility for the 55,799 children enrolled in Federal schools and housed in Federal dormitories. The BIA had partial financial responsibility for approximately 2/3 of those enrolled in public schools. Included in the statistical breakdown are (1) school census, enrollment and average daily attendance (ADA) by area and agency, (2) number of schools operated, the enrollment, and the ADA of boarding, day, and hospital schools, (3) dormitory enrollment and ADA, (4) enrollment by grade, and completions and graduates by area, (5) enrollment by degree of Indian blood and tribe, (6) school construction summary, (7) activities under the Elementary and Secondary Education Act, and (8) summer program participants. A related document is ED 002 665. [Not available in hard copy due to marginal legibility of original document.] (CM)

EDUCATION OF INDIAN CHILDREN IN 1968

Indian children attend public, Federal, private, and mission schools. In fiscal year 1968 there were 142,630 Indian students, ages 6 to 18 years, inclusive, enrolled in these schools in the United States. Compared to 138,501 students last year, enrollment increased 3.0 percent.

Education of Indian children residing in the States of California, Idaho, Michigan, Minnesota, Nebraska, Oregon, Texas, Washington, and Wisconsin is the responsibility of the state concerned.

In 1968 more than half (57.4 percent) of all Indian children of school age (6 - 18) attended public schools. Of those enrolled in school, 61.3 percent attended public schools, 32.7 percent attended Federal schools, and 6.0 percent attended mission and other schools. Comparable percentages in 1967 were 60.0, 33.6 and 6.4.

For more than three centuries Indian education in the United States was largely under the direction of missionaries. As early as 1568 the Jesuit Fathers organized a school at Havana, Cuba, for Indian children from Florida. This was the first school attended by Indian children who lived within the United States.

Many of the treaties between the United States and Indian tribes provided for the establishment of schools for Indian children. Congress has also provided schools for Indian children where other educational facilities were not available. In 1842, there were 37 Indian schools in operation and by 1881 the number had increased to 106. In 1968 the Bureau of Indian Affairs operated 226 schools with an enrollment of 51,595 Indian children, and 18 dormitories for 4,204 children attending public schools.

The education of Indian children is part of a National objective for Indians delineated by President Johnson in March of 1968 when he set forth these goals: A standard of living for the Indians equal to that of the country as a whole. Freedom of choice: an opportunity to remain in their homelands, if they choose, without surrendering their dignity; an opportunity to move to the towns and cities of America, if they choose, equipped with the skills to live in

equality and dignity. Full participation in the life of modern America, with a full share of economic opportunity and social justice.

Federal schools are operated for Indian children living on Indian-owned or restricted trust lands to prepare them for successful living. In Federal schools children develop basic academic skills, acquire an understanding of the social and economic world which surrounds them, learn improved standards of living, follow practices which assure optimum health, acquire the necessary vocational training to qualify for gainful employment, and obtain sufficient education to enter special schools and institutions of higher learning. The system of schools provided by the Federal Government for Indian children meets program standards required by the States in which they operate, and all secondary schools are accredited so that graduates may enter college on the same basis as public high school graduates. A full 4-year high school course is offered at 25 schools. Three other schools offer high school training at less than the full 4-year course.

Indian children are entitled to the same opportunities for public school education as are provided for other citizens living within a State. It is encouraging to note that the States have assumed responsibility for the education of 87,361 (57.4 percent) school-age Indian children in the States where the Bureau of Indian Affairs has direct educational responsibility. Over one-third are educated at no cost to the Bureau of Indian Affairs. In some States, however, tax-exempt, Indian-owned lands and large numbers of Indian children within a school district may create financial burdens for which local funds are inadequate. As early as 1890, contracts providing for financial assistance to schools attended by Indian children were negotiated with individual districts. It was recognized then, as today, that Indian children become better adjusted to living with all people in a community when they associate with other children in public schools. The Johnson-O'Malley Act, which became law in 1934, authorized the Secretary of the Interior to enter into contracts with States for the education of Indians and to permit the use of Federal school buildings and equipment by local school authorities. Consequently, some States with large Indian populations now have no Federal schools within their boundaries.

Under the terms of Public Law 874, 81st Cong. (94 Stat. 1100), as amended August 13, 1958, administered by the Department of Health, Education, and Welfare, a new federal aid resource was made available to eligible school districts educating Indian children. This aid is available to meet partial costs of normal school operation. Additional supplemental aid for the education of Indian children under the Johnson-O'Malley program is limited to districts that do not qualify under the Public Law 874 program and to districts meeting educational problems under extraordinary circumstances, including special services and special program designed to facilitate the education of Indian children.

In fiscal year 1968, the Bureau of Indian Affairs entered into contracts with 14 States and with school districts in 4 other States, in accordance with approved plans which specify conditions under which financial aid is extended. In addition to these, aid was provided through contracts for the education in public schools of 2,257 out-of-district Indian children living in dormitories operated by the Bureau of Indian Affairs in 7 towns adjacent to the Navajo Reservation, and in Albuquerque, New Mexico.

In summary, then, the Bureau of Indian Affairs had direct responsibility for the 55,799 children enrolled in Federal schools and housed in Federal dormitories, and partial financial responsibility for approximately two-thirds of those enrolled in public schools.

Statistics concerning Indian education are published annually by the Bureau of Indian Affairs and are available the fall following the close of the school term which they cover.

Congressional appropriations to the Bureau of Indian Affairs are limited to the education of children of one-fourth or more degree of Indian blood and native children in Alaska, except for the Cherokee Agency where children of less than one-quarter degree of Indian blood enrolled in the tribe may attend Federal Schools. Native children in Alaska are Indian, Eskimo, and Aleut. The 14 tables below relate to Indian and native children, as defined above, and to their schools.

Table 1 shows the enumeration of all Indian children from 6 to 18 years, inclusive, and those over 18 who are enrolled in school by area, agency, and school status.

For Indian children who are enrolled in public schools and are no longer a Federal education responsibility, the Bureau must rely on the public school systems to provide census information. Indian mobility accounts for the children, 6 to 18 years inclusive, who are shown under the caption "Information Not Available."

It should be noted that children under 6 and over 18 are not included in the enumeration of school-age population. Table 1 is based on the annual school census of Indian children 6 to 18 years old, while tables 2 through 11 are derived from annual attendance reports of individual schools operated by the Bureau of Indian Affairs and cover all students enrolled regardless of their ages.

Table 2 indicates enrollment and average daily attendance in Federal schools by type of school and area. Average daily attendance for all schools, exclusive of hospital schools, was 87.4 percent in 1968 as compared to 88.2 percent in 1967.

The following changes account for a net decrease of 21 in the number of facilities operated in fiscal year 1968. In the Juneau Area, 1 day school opened and 10 day schools were transferred to the State of Alaska public school system for operation. One day school in the Muskogee Area closed and pupils attended public schools. In the Navajo Area, 4 boarding schools, 6 day schools and 1 hospital day school closed and 1 boarding school and 1 day school opened. Blackwater Day School, in the Phoenix Area, was operated by the local community school board and is therefore not counted as a Bureau operated school. In the Portland Area, Warm Springs Dormitory closed.

The Concho Demonstration School in the Anadarko Area operated as a special school for the rehabilitation of students with educational problems. The school staff conducted a remedial program designed to reorient the student to the school he left or to a school more in keeping with his needs and objectives. The school had a capacity of 44 pupils. During 1968, a total of 41 pupils were served for varying periods of time. Average daily attendance at the school was 26.8. By the close of the school year 4 pupils had been transferred to other Federal schools and their enrollment is included in the enrollment of the other schools.

Trailer schools were operated as temporary educational facilities at 2 locations for Navajo children living in isolated parts of the reservation. Of 188 students, 71.3 percent were enrolled in the beginners and first two grades in 1968. The operation of these units, often supplemented with quonset huts, has been successful as a temporary measure, but these trailer schools are being replaced by adequate school buildings wherever the population and regular daily attendance warrant permanent facilities.

Tables 4, 5, 6 and 7 list individual schools, instructional units in hospitals, and dormitories operated by the Bureau of Indian Affairs, mailing address, enrollment, average daily attendance, and grades taught. The Albuquerque Dormitory is operated in conjunction with the Albuquerque Indian School but is shown with peripheral dormitories because these dormitory students attend public schools under conditions identical to other peripheral dormitories.

Table 8 indicates grade level. In 1968 enrollment in the beginners and first 4 grades decreased by 219 pupils to 23,170 as compared to the previous year's 23,389. This group represents 44.9 percent of the entire student body. An enrollment of 2,290 ungraded elementary and secondary students account for 4.4 percent of total enrollment.

In line with the Bureau's policy of encouraging public school enrollment of Indian children, many students transfer to public schools when they reach the sixth grade and have acquired some facility in the use of the English language. This is a factor in the seemingly low numbers of graduates of Federal high schools. In fiscal year 1968, 2,041 high school students graduated, a decrease of 2.8 percent from 1967.

Table 9 indicates the number of high school graduates, number of 8th grade completions, and number of Post High completions.

Table 10 indicates students according to their degree of Indian blood. Full bloods comprise 80.9 percent of the total and only 3.8 percent are less than one-half Indian.

Table 11 shows tribal designation of students in Federal schools. One hundred specific tribes or tribal groups and Aleuts, Eskimos, and the various tribes of Indians in Alaska were represented in 1968.

Sixty-four tribes had fewer than 40 members each and these are grouped together as "All Other Tribes." Aleuts, Eskimos, Navajos, Sioux, and Pueblos (including Hopi, shown separately) are the most numerous and together comprise 77.5 percent of the total enrollment.

Table 12 indicates the completed school construction, both new and replacement, during fiscal year 1968.

In fiscal year 1968, the Bureau of Indian Affairs participated for the second year in the Elementary and Secondary Education Act. Table 13 indicates the extent of the activities carried out under Titles I, II, III, and VI, of the program.

Table 14 shows the number of participants in the summer program, by category, for fiscal years 1960 through 1968.
